### **Mega-Prompt Launches New Levels for Mega Bee**

**Silver Spring, Maryland, May 16, 2013** – Mega-Prompt, a mobile app developer and publisher, announced new levels for the Mega Bee mobile game for the iPhone, iPad and iPod Touch. Both the free and the HD versions are available at the Apple App Store.

Mega Bee is an exciting swiping game from Mega-Prompt. Users swipe around the screen to help the bee collect ice cream cones, bananas, cupcakes and more. Bees travel through each level, collecting items while avoiding hazards such as pirates, alligators, aliens, dinosaurs, snakes etc. The three new levels include Outer Space, Pirate Cove and Tropical Jungle. After completing all levels, users can unlock the hard mode and try again. Mega Bee is suitable for all ages.

Mega Bee's first new level is Outer Space and features floating spaceships, ray gun-wielding aliens and exploding stars. The new Pirate Cove level features chomping alligators, a peg-leg pirate and barrel bombs. Finally, the Tropical Cove level contains giant mosquitos, a grumpy gorilla and allows for a Safari Bee character customization.

Mega-Prompt Graphic Designer, Joe Widener said, "This time around, we added more character customization which has tested really well amongst our younger users."

### **About Mega-Prompt**

Mega-Prompt is a new mobile app development, marketing and publishing company. It is part of the Dynaxys family, a woman-owned small business that delivers mobile applications, software, hosting and accounting solutions to government, commercial and non-profit clients.
